PES University - Dept. of CSE
Lab 1: Requirements Engineering & UML Use-Case Modelling
Problem Statement #43 - Feature Flag & Dynamic Config Manager

UML Use Case Diagram

Actors: Software Engineer, Release Manager (primary); Client SDK (secondary / system actor).

The diagram models all actors and primary use cases. It includes one <<include>> relationship (Evaluate feature flag includes Evaluate targeting rules) and one <<extend>> relationship (Rollback flag extends Approve & publish flag).

Use cases shown

- Create feature flag - Software Engineer
- Configure rollout rules - Software Engineer
- Set environment override - Software Engineer
- Evaluate feature flag - Client SDK (includes Evaluate targeting rules)
- Approve & publish flag - Release Manager (extended by Rollback flag)
- View audit log - Software Engineer, Release Manager
